AASHTO #57 Stone Specs AASHTO #57
stone as defined by quarries, state
agencies, etc. is an open-graded, self-
compacting aggregate blend of size 5, 6,
& 7 stone. This material cannot be
'compacted' in a true sense, but can be
properly oriented with compaction
equipment. This is particularly important
when using #57 stone under Flexi-Pave
surfaces.
