Airborne Vibration Monitors (AVM). All Series of 737 have the facility for AVM although not all 737-200's have them fitted. The early 737-1/200's had two vibration pickup points: One at the turbine section and one at the engine inlet there was a selector switch so that the crew could choose which to monitor.

Power Plant - The Boeing 737 Technical Site

The 737 has a firm place in the hearts of aircraft operators, crew and passengers. It's also won over flight simulation fans in this state-of-the-art expansion which is now fully updated for Flight Simulator X and Windows Vista/7 (32-bit)/8 . Three versions of the 737 are included, with over 70 richly detailed liveries.
