My girlfriend has not had her period since the middle of october and she is very worried and so am i. She took 3 pregnancy tests from 3 different makers and all 3 said negative. Is it still slightly possible she could be or what else could it be? She's not on any new medication or anything, i highly doubt it's her job stressing her out she's had it for almost 7 months and this hasn't happened ...

Leaving Out A POSITIVE PREGNANCY TEST On Boyfriend..

The hormone level increases as your pregnancy progresses. Home pregnancy tests are designed to detect this hormone. If hCG is present in your urine, you'll have a positive test result. It's important to note that the more hCG in your system, the easier it is to see and read a positive line on a home test.

Faint Positive Pregnancy Test: Are You Pregnant?

At-home pregnancy tests work by testing a small sample of urine for hCG—human chorionic gonadotrophin. hCG is the pregnancy hormone that is produced by the developing embryo and, later, by part of the placenta.

Read on for everything you need to know about drug tests while pregnant. Can Drug Tests Detect Your Pregnancy? You've probably heard stories of men using their wives' urine to pass drug tests and then being told that they're pregnant. In reality, though, a properly conducted drug test should not be testing for pregnancy.
